

AI POWERED JOB HUNT

AI RESUME BUILDER

Create a strong base resume and then add AI-generated achievements, professional summaries, and personalised cover letters to save time.

Built-in proofreading tools to help you avoid mistakes, access to more than 1,500 resume examples, AI cover letter writer that automatically creates cover letters.

Offers detailed tips for improvement, the ability to save and download multiple versions of your resume, and 18 resume templates.

Its features include more than 500 resume and cover letter templates, sample resumes and additional career resources, such as interview advice.

Its features include Shareable resume links, having cover letter builder, and Analytics that allow you to track views.

AI JOB MATCHING PLATFORM

It's a resume optimization and job application platform that tracks all the applied jobs from one place.

Its features include having a dashboard that gives real-time access to job seekers and having a user-friendly mobile app. The tool also suggests CV and resume improvement.

Its features include: excluding the companies you have previously worked with or are not interested in working with, it searches for the best emails of the companies that match your job preference.

It includes various features like automated job tracking, skill insights, and AI-generated cover letters. Besides this, the tool focuses more on LinkedIn profile optimization.

It gives insights and analytics into the number of applications sent, reviewed, shortlisted, and rejected. It gives job seekers detailed guides, tips, and valuable resources.

It generates a personalised cover letter. The Chrome extension saves the response and recommendations for the future.

LOOPCV

LoopCV finds the email of the recruiters, crafts personalised emails and sends emails automatically. Job seekers can use an auto-apply feature.

JOBWIZARD

It optimizes your resume and improves job applications based on LinkedIn history. It offers a free Chrome extension that applies for jobs on automation.
